There is exploration going on at that site, but not for porphyry copper.

That was a strange point attributed to Alaska Earth Sciences. Probably an error in the mtrs entry.

This one looks great. I will use this. Can you take out the lone dot in the middle. That is not a porphyry copper deposit.

Hi Phil - I like the dots better. Here is one map zoomed out to include Humble as well. Let me know if you need any edits.

Becky

Thanks Becky. Is it possible to do this with a wider view that shows the Humble Prospect too? That is the only other porphyry copper prospect that I know of, so we would not be interested in any of the other mines.

Which view do you think looks better?

Subject: pebble maps

Hi Phil,

Here is a map of claims and twups in the pebble area. Let me know if you like the dots or shaded sections better and I will make one for the Humble area. Is there any other data you want displayed on these maps?

Becky
